### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2,4,6,9 and 12-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Hunn et al (USPubN 2004/0158207). Hunn discloses a device that includes a housing, a needle hub, two springs, and a trigger. The needle is retracted into the housing after insertion of the cannula into the patient. See figures 9-12.

Claims 1,3-10,13 and 15-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Marano-Ford et al (USPN 6,926,694). Marano-Ford discloses a device that includes a housing, a needle hub, a spring, and a trigger. The needle is retracted into the housing after insertion of the cannula into the patient. See figures 9-12.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3763

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marano-Ford. Marano-Ford meets the claim limitations as described above but fails to include the device having a tamper-evident band.

However, at the time of the invention, it would have been obvious to incorporate the tamper-evident band into the invention of Marano-Ford. Tamper-evident bands are well known in the medical arts and are common used in order to provide evidence that the device is still sterile prior to use. The motivation for the incorporation would have been to enhance the safety and sterility of the device for use.

#### ***Allowable Subject Matter***

Claim 14 is allowed.
